International Union of Operating Engineers - Local 701

Who We Are: Labor union founded in 1918 and currently representing over 3,500 heavy equipment operators, heavy duty repairers, technical engineers and stationary engineers working throughout Oregon and Southwest Washington.

What We Do: Local 701 has formed and shaped the roads, infrastructure and skylines of our region. Today we operate the constructions industry’s largest cranes and most sophisticated pieces of construction equipment. Wherever you go you see our construction members’ work – from roads and highways to bridges, dams, and power plants to office buildings, high rise condos and hospitals. If it is a large structure – members of Local 701 were probably part of building it.

Our stationary members are engaged in many facets of the manufacturing industry, food production industry, building maintenance, hospitals, and data center facilities, where we are charged with operations and maintenance of mission and safety critical systems.
Types of Work: Asphalt Paving, Boom Truck Service, Boring Contractor, Bridge and Dock Work, Building Contractor, Cement Manufacturing, Concrete Paving, Concrete Pumping, Concrete Specialties, Crane Rental and Rigging, Demolition Contractor, Directional Drilling, Dredging and Marine Construction, Drilling Contractor, Excavation and Grading, General Contractor, Guardrail and Barriers, Pile Driving, Pipeline, Pole Foundations, Sand & Gravel and Concrete Producers, Signing and Traffic Signals, Steel Erector, Survey Contractor, Underground Utilities.

Types of Equipment: Asphalt (plants, paver and grinders), Boring & Tunneling Machines, Backhoes, Blades (motor graders), Bobcats, Boom trucks, Bulldozers, Compactors, Concrete (plants, pavers and grinders), Cranes (all types and sizes), Crushers, Derricks and related equipment, Dredges and related equipment, Drills (all types and sizes), Elevators, Excavators, Forklifts, GPS grade Setting and checking equipment, Heavy Duty Repair and Service equipment, Hoisting equipment, Jacking equipment, Loaders, Pumps (trucks, portable and Stationary), Shovels (dragline and clamshell), Side Booms, Survey (total station, GPS and laser scanning), Tractors, Trucks (off-road, heavy haulers and water), Underwater and Remote operated equipment, Welding Machines.

Basic Services Provided: Training, continuing education, centralized job dispatch, health insurance and pension programs.

Website Features: Contractor locator function, information on training programs, general information and photos on types of work and equipment used, and live links to job sites.
